Southern Entrance — Concept 1 — Charles Veryard Reserve

KOMPAN®

The Cocowave Swing builds balance, coordination, and body awareness while encouraging shared, social play.

This trail develops balance, coordination, and body control as children move across different elements in different ways. It also builds confidence, concentration, and risk awareness through varied movement challenges.

The monkey bar builds upper body strength, coordination, and endurance while challenging children to move confidently from one side to the other. It also supports perseverance and a sense of achievement.
